## NEWS RELEASE

P THOMSON FINANCIAL SUPPL

### "MORE ENCOURAGING GOLD RESULTS FROM SUBRISO"

Vancouver, September 20, 2002, St. Jude Resources Ltd. (SJD:TSX.V) is pleased to announce additional significant drill intersections from its South Benso concession in Ghana, West, Africa. This extensive and ongoing gold exploration program is a joint venture project with Fairstar Explorations Inc. The results set out below are from the Subriso East, Subriso West and Subriso Central gold deposits.

Hole #	Dip Degrees (-)	Azimuth	Coordinates		From -To (m)	Interval Width (m)	Grade g/t Au	Deposit
			North (m)	East (m)

"					124 - 126	2	3.17	S.C.

Subriso West (S.W.) Subriso Central (S.C.)

The company continues to be encouraged by the consistent above average grades and widths of the gold intersections which have been encountered at the Subriso deposits. For example, recently announced results from Subriso include:

- | Subriso East Zone  | Subriso West Zone  | Subriso Central Zone   |
|--|--|--|
| <ul style="list-style-type: none"> <li>• <b>10m of 14.49 g/t au</b></li> <li>• <b>9m of 15.96 g/t au</b></li> <li>• <b>9m of 11.84 g/t au</b></li> </ul> | <ul style="list-style-type: none"> <li>• <b>14m of 10.29 g/t au</b></li> <li>• <b>36m of 7.16 g/t au</b></li> <li>• <b>29m of 9.42 g/t au</b></li> </ul> | <ul style="list-style-type: none"> <li>• <b>10m of 14.87 g/t au</b></li> <li>• <b>15m of 10.02 g/t au</b></li> <li>• <b>12m of 78.71 g/t au</b></li> </ul> |

The results from the first 100 drill holes at Subriso are being evaluated at this time and the next phase of drilling is expected to commence mid to late October 2002, with a view to determining the overall potential strike and depth.

The attached map illustrates the strategic location of the Benso concession in relation to the company's Hwini-Butre project, which is adjacent and directly to the south. After an extensive surface exploration and drill program, an initial gold resource of 936,000 oz. (562,000 oz. indicated and 374,000 oz. inferred) has already been delineated on the Hwini-Butre project. This gold resource has been established at the southern deposits which include the Adoikrom, Father Brown and Dabokrom zones. Further exploration has taken place at the Hwini-Butre concession subsequent to the establishment of the initial resource. Examples of some of the more significant recently announced gold intersections from the Adoikrom zone are as follows:

#### Adoikrom Zone

- **14m of 11.29 g/t au**
- **12m of 32.08 g/t au**
- **14m of 49.98 g/t au**

Results from this most recent round of drilling at Hwini-Butre will be included in the company's next resource estimate. Additionally, there are several highly prospective and advanced exploration targets within the Hwini-Butre concession, including Seikrom, Breminsu and Apatunso, where future drilling could increase the company's gold resource.

It should be noted that the initial resource estimate published on company's Hwini-Butre project was based solely on previous drilling from Adoikrom, Father Brown and Dabokrom prospects and does not in any way include drill results from the company's South Benso-Subriso deposits. The company is hoping to be in a position to provide an initial resource estimate from the South Benso-Subriso area once the next phase of drilling has been completed.
